

BISMARCK
MEADOWS RD.

This engineering plan view illustrates a detention pond and its associated riprap apron. The pond, labeled '5', has a bottom elevation of 122.8. It features an outlet structure with an invert of 22.70 and a 33 LF 24" RCP pipe with a 0.9% slope. The pond is surrounded by a 100' buffer zone. To the left, a road with stationing 15+00 and 16+00 is shown, along with a proposed street light. The plan includes various structural details such as a 6'x20' riprap apron, a sediment forebay, and a forebay outlet. Elevation points and stationing are marked throughout the drawing. A handwritten note at the bottom left reads 'between'.
