Re: Traffic Signals at Acushnet Avenue / Ashley Boulevard

Mr. Chairman,

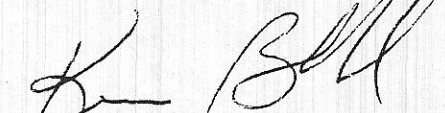

I have investigated your request and offer the following:

On Thursday October 21 I met with Bob Gregory from the State DPW office in Taunton. Mr. Gregory agreed with my proposed changes and has allowed us to make the improvements with stipulations.

I must provide him with a drawing of the changes and a letter of explanation outlining the improvements. The City must also repaint the original demarcation lines, (lane separation, stop lines and double yellow lines at the center of the road). This will return this intersection "to permit" and make it legal once again.

Prior to me going further on this project I will need Mayor Kalisz's approval. Please call me when you have spoken to him so that I can proceed.

Thank You,

Kenneth F. Blanchard
Inspector of Wires
