Re: Traffic Signal Catalog Cut Review
Freight Railroad Bridge Improvement
New Bedford, Massachusetts

Dear Ms. Dunn,

Vanasse Hangen Brustlin, Inc. (VHB) has reviewed the traffic signal equipment catalog cut submittals from Dagle Electrical Construction Corp. for the above referenced project. Based on our review, we find the following equipment to be **Furnished as Requested**, or **"Approved"** subject to the terms and conditions on the shop drawing stamp, for application to the above referenced design documents.

We note that the Contractor still needs to submit paint chips and sample finishes on aluminum/steel of the intended color to the City of New Bedford for approval, prior to any work being done.

Furnish As Requested

800-59 5x7

Pedestrian Informational Sign. Replace 800-59 with Model #800-63

Approved
