Re: 139 & 141 Union Street, New Bedford
WO # 2236356 & WO # 2236360

Dear Ms. Rosa,

Upon review, the City of New Bedford's Department of Public Infrastructure has approved the advanced request submitted by Eversource Energy for work to be done at 139 & 141 Union Street. The department acknowledges the time-sensitivity of this project and will permit work to conduct at the specified location.

Please note, due to the winter season and frequent potential snow fall, steel plates are not to be left on the roadway for extensive periods of time. Please schedule work accordingly to ensure any steel plates needed to perform the work are cleared of the roadway as quickly as possible. Steel plates left in the roadway create a safety hazard for the Department's plow drivers during a snow storm event. Once the work is completed, the trench within the roadway is to be patched with Hot Mix Asphalt in accordance with the DPI Construction Standards. Any work performed within the sidewalk layout is to be repaired in kind.

Any questions, please call the office at (508) 979-1550.

Thank you,

Manuel H. Silva

New Bedford, MA 02746

Re: 139 & 141 Union Street, New Bedford

WO#2236356 & WO#2236360

Dear Mr. Silva:

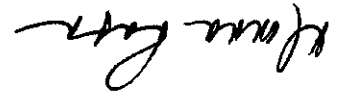

Eversource Energy is requesting permission to install 32' of 2 - 4" conduits at 139 Union Street, West of South Second Street, and 12' of 2-4" conduits at 141 Union Street, West of South Second Street, New Bedford, Ma..

The reason for this advance request is due to the High Exposure Funded Project by the State for Non Profit Organization WHALE, which is to accommodate a Juice Bar, Art Gallery and four tenants who will be moving in by the end of the year.

We will be forwarding to the City Council Office the "Petition for Location of Conduits" for Council approval in the near future.

Thank you for your advance permission in this installation.

Very truly yours,

Donna Rosa
