Plan Review Comments:

: Conservation Commission issuance of Order of Conditions has requirements prior to construction including request for inspection of erosion controls prior to any site work

: need a site plan that shows entire lot, utilities, grading and the Bank of Sassaguin Pond and associated Buffer Zone. Then applicant needs to file a Notice of Intent with the Conservation Commission and obtain an Order of Conditions from the Commission before I can sign off on any Building Permit.

: Must follow DPL requirements

: Construct a 50' x 16' 6" foundation as per plans submitted

: Any changes, alterations, removal, or installation of any plumbing or gas fixture will require a permit as per provisions of 248 CMR

: Any changes, alterations, removal, or installation of any plumbing or gas fixture will require a permit as per provisions of 243 CMR.

: any new fire alarm system will require a permit from Fire Prevention Office. Follow all state and local fire codes

: NOTE: DEMO,,, WILL NEED ELECTRICIAN AND ELECTRICAL PERMIT FOR ANY ELECTRICAL WORK ASSOCIATED WITH THIS DEMO AS WELL AS LICENSED ELECTRICIAN AND ELECTRICAL PERMIT ATTACHED TO THE NEW DWELLING UNIT TO BE CONSTRUCTED AT THE PRESENT LOCATION.

: THIS FOUNDATION WILL REQUIRE AN ELECTRICAL PERMIT FOR A "UFER GROUND" CONCRETE ENCASED ELECTRODE FOR CONNECTION TO THE BUILDING GROUNDING ELECTRODE SYSTEM PER THE NATIONAL ELECTRICAL CODE ARTICLE 250.52(3).

RE: TB-20-1951
Morton Ave. (W.S.) 732' N. x Tobey St. (f/k/a #1489 Morton Ave.)
Plot 136A Lot 804
Reviewed 2/19/2021

PLEASE NOTE:

It is the responsibility of the applicant and the contractors to be familiar with DPI procedures/regulations and ascertain that all proposed work which falls under DPI jurisdiction, whether shown on the submitted site plan or not, is identified and executed in accordance with City of New Bedford DPI Construction Standards/Specifications. The Certificate of Occupancy (CO) will not be signed for any work performed that is non-compliant and/or if any of the following conditions are not met. The following conditions are to be met by the applicant (being the owner and/or their representative) as part of this permit approval:

1.) The site plan submitted in View Permit, titled: "Building Permit Plan, Parcel 136A-804 (F/n/a #1489), Morton Avenue, New Bedford, Massachusetts", having a date of 9/25/2020 (last revised 2/19/2021), as prepared by Zenith Land Surveyors, LLC and stamped/signed by Jamie L. Bissonnette, P.E. (Civil) and Jonathan J. Pink, P.L.S., was approved for DPI permitting, with the following conditions:
a. Provide adequate access to utilities that are being proposed to run under new porches, decks, etc. such that said structures do not have to be compromised when maintenance/repair of said utilities is required in the future.
d. Provide the "final" site plan submitted for DPI permitting (or any modifications approved thereafter) to Inspectional Services to be placed on file in the View Permit system.

2.) Must provide 1 stamped/signed copies of the "final" site plan approved by DPI for each of the permits being sought (i.e. water, sewer/drain and sidewalk/driveway permits) for the proposed structure. In addition, a copy of the foundation permit and of the stamped/signed foundation as-built plan must also be submitted.

Please Note: Any representative pulling permits on behalf of the owner must provide DPI with a permission slip. If the property was acquired within the past 6 months, then a copy of the recorded deed showing property ownership must also be provided.

3.) Compliance with the City of New Bedford Stormwater Rules & Regulations/Ordinances is required for all project sites, regardless of size. All sites must implement sediment and erosion control measures and will be subject to the required construction site and sediment control inspections.

4.) Must contact DPI-Engineering to measure for an address number once the front door is framed. The CO will not be signed unless the legal address issued by the City is permanently affixed to, above, or next to, the main door entrance to which it was assigned such that it is highly visible from the street.

Please be advised that any and all future modifications to the site plan that was reviewed/approved for the above project and placed on file at DPI as the "final" site plan for permitting must be resubmitted for review/approval if said changes entail work that falls under the jurisdiction of DPI.

Plot 136A Lot 804
Reviewed 1/29/2021

The plan recently submitted with a revision date of 1/18/2021 (dated 9/25/2020) is pending being updated to reflect the correct record information and the numerous edits, as discussed in DPI's phone conversations this morning with the surveyor at ZLS (John Pink) and the civil engineer at ZCE (Jamie Bissonnette) regarding DPI requirements and construction specifications/standards.

RE: TB-20-1951
Morton Ave. (W.S.) 732' N. x Tobey St. (f/k/a #1489 Morton Ave.)
Plot 136A Lot 804
Reviewed 2/17/2021

The following revisions need to be made prior to the permit being approved:

1. The plan recently submitted with a revision date of 2/8/2021 (dated 9/25/2020) was reviewed. It was noted that a "new" water service is being proposed from the point of capping all the way to the new house. However, since couplings are not allowed, the portion of the water service to be installed as "new" must begin at the existing curb stop and run to the new house. Please change the line type to indicate that it is to be "new" from the existing curb stop to the house.
2. Per a recent site visit by DPI, it was noted that there is an existing water meter pit which is not shown on the site plan (probably missed on the survey?). Please locate said meter pit and show/label on the site plan, with a call out that the existing meter pit is to be abandoned in accordance with DPI Requirements/Standards. New meter must be installed at point of entry into the new house.
3. Label the portion of "new" sewer service to be installed as "Prop. 6" SDR 35."
4. DPI has no issues with the driveway opening size/location as shown, however, a minimum distance of 3' must be maintained from the northly edge of the proposed opening to the trunk of the existing tree within the City layout. The driveway installation is not to compromise/damage the root system so as to result in the death of said tree. Please call out this minimum distance on the plan.
5. Please update the callout on the "Proposed Site Plan" view to "Existing House #1489 (Razed)", as was done in the "Existing Conditions Plan" view.

An email was sent to John Romanelli today with the above comments.

RE: TB-20-1951
Morton Ave. (W.S.) 732' N. x Tobey St.
Plot 136A Lot 804
Reviewed 1/6/2021

The plan recently submitted in View Permit is a building permit plan (dated 9/25/2020) and does not contain the information required for DPI to conduct a proper review of the site. The company that prepared the plan, ZLS, should refer to the final site plans that it submitted to DPI for similar projects (i.e. Bryant Ln., Almy St., etc.) for guidance and update this plan accordingly if it is to be utilized as the site plan. All proposed work that falls under DPI jurisdiction is to be shown and meet DPI requirements and construction specifications/standards.

A quick checklist of the elements that need to be incorporated into the site plan to be submitted for review by DPI was included in the review done by DPI on 9/2/2020.

The design engineer and/or land surveyor should contact the DPI Engineering Dept. with any questions regarding DPI requirements that need to be met and the construction specifications and standards that are to be implemented. Copies of said specifications and standards are available at DPI.

RE: TB-20-1951
Morton Ave. (W.S.) 732' N. x Tobey St.*
Plot 136A Lot 804
Reviewed 9/2/2020

The only plan presently in the View Permit for review is an architectural plan. Said plan does not contain enough information for DPI to conduct a proper review of the site. A site plan will need to be submitted to DPI, showing all proposed work that falls under DPI jurisdiction and which is to meet DPI requirements and construction specifications/standards.

The following is a quick checklist of the elements that need to be incorporated into the site plan to be submitted for review by DPI:

1. Please check that all existing site conditions are shown (i.e. buildings, utilities, mains/service connections, shut offs, clean outs, septic system (if any), driveways/sidewalks, curb/berm or edge of pavement, grading, etc.) and properly labeled.
2. Clearly depict and properly label all proposed work (i.e. new structure(s), water/sewer/storm drain mains/service connections or septic system, driveway(s)-new/closure/widening, storm recharge system for roof runoff/calculations/details, grading, etc.).
3. Check that the proposed building footprint on the site plan and the architectural drawing are the same since DPI only approves the building footprint as shown on the site plan.
4. Check that the site plan being submitted has been stamped/signed by the proper professional(s) responsible for the site development and design (i.e. Professional Engineer and/or Land Surveyor, depending on the case).
5. *Please do not reference the address of a structure that was/or is going to be razed (in this case, #1489 Morton Ave.) in the site plan title for a new building. For example, the title should reference the street name and the parcel id., and state "(t/k/a #1489 Morton Ave.)". The new building does not automatically assume the address of the structure that was previously on the lot.

The design engineer and/or land surveyor should contact the DPI Engineering Dept. with any questions regarding DPI requirements that need to be met and the construction specifications and standards that are to be implemented. Copies of said specifications and standards are available at DPI.

: Install new copper service from curb stop/shut off to meter. Water Couplings are not allowed.
: Owner to submit site plan to review.
: site plan does not show water service location
