Re: N.B. Seafood - 28 Kenyon St.

1. Item C of this form requires a "Site Plan" - in my opinion this means a regular engineering drawing to scale and showing the required information.

2. Item D8: 200 gal per day is unrealistic. Most other fillet plants in the City are using between 25,000 and 100,000 + gal per day.

3. The bldg connection to the control man hole should be as direct as possible with the use of fittings.
