Department Of Public Works

Dear Sir:

This Permit Request is for relocation of tie in to existing City Sewer and Storm Drain on the West End of Shaw St. at the intersection of King.

Presently, both Storm and Sewer terminate at the end of Shaw St. in a Tee and extend North and South on our Property.

We are proposing to construct an addition to our existing Facility as shown on the attached Print.

This proposed addition would extend beyond the existing underground piping as indicated.

We plan to relocate these underground services out from under the proposed Slab and Foundation into the existing Parking Lot. This will facilitate any future repair or maintenance.

The Lines, which will be relocated, would include Storm Drain, Sewer Drain and Sprinkler Yard Main.

Factory Mutual has already approved the proposed relocation of the Sprinkler Main.

To facilitate this relocation, we propose to tie into the municipal lines at a point several feet east of their existing location.

We propose to extend our existing Sewer Line to the North End of the Building and leave provisions for future use.

All existing connections to both Storm and Sewer would remain as is and just be extended to meet the relocated piping.

There will be no new connections (with the exception of 2 Drain Grates at Overhead Doors) to either the Sewer or Storm Drains.

The addition will be used for Production Equipment which will not need these services and will not change any of our existing Influent or Effluent Flow by volume or content.

If you need additional information, please contact the undersigned.

Donald Sargent, PE.
Plant Engineer
