**CITY OF NEW BEDFORD**  
**MASSACHUSETTS**  
**DEPT. OF PUBLIC WORKS**

To: The Homeowner

Date: April 12, 1979

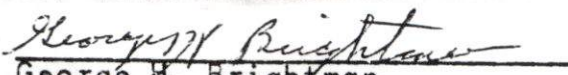

The Town of Dartmouth is currently installing a new sewer system part of which will be located in certain New Bedford city streets, New Bedford homeowners living along the path of this system will be allowed to tie into the line.

In order to accommodate such property owners, connection fittings will be installed on the sewer mains in the street as construction progresses. The proper location of these connection fittings will be determined from the information supplied by the property owner on the attached location form.

Please indicate on this location form the house number, street name, depth from the top of the cellar wall to the cellar floor, the location at which you wish the sewer connection to enter the house, and the location of any obstacles such as trees, driveways, septic tanks, etc. BE SPECIFIC! The assistance of a plumber in furnishing the information requested may be advisable.

The location form consists of three (3) copies. The Homeowner's copy is to be retained by you for your record. The remaining two copies must be returned within ten (10) days to the City Engineer's Office, Room 303, City Hall, New Bedford. IMPORTANT! If the above information is not returned within the time specified, the engineer on the job will use his own discretion for location of service.

Connection to the sewer system will be allowed by permit only. Cost for such permit will be \$440.00, plus the cost of the individual connections. This latter cost will vary slightly between locations. Connection to the system is NOT obligatory at this time. You may continue to use your present septic system if you wish. Permits and/or information may be obtained at the City Engineer's Office. Connections will be allowed for sanitary sewage only. No storm-water, roof runoff, ground water, or cellar floor drainage will be allowed to enter the sanitary sewer system.

  
George H. Brightman  
Commissioner DPW
