RE: TB-17-3080

20 S. Sixth St. (Purported Address)

[Proposed Renovations to Existing Building and Addition for Housing-Y.W.C.A.]

Plot 46/Lot 69

Reviewed: 2/7/2018

The following conditions are to be met by the owner/representative as part of this permit approval:

- 1.) Per the preconstruction meeting held at D.P.I. on 2/7/2018, all requirements/conditions as set forth by D.P.I. at said meeting in regards to the development of this site must be met accordingly, and all construction must be in accordance to City of New Bedford Construction Standards and Specifications. The revised plan submitted to D.P.I. prior to this meeting was marked "Bid Set" and was titled "Renovations to the YWCA Southeastern MA, 20 South Sixth Street, New Bedford, MA", with a date of 6/9/2017 (and revision date of 10/4/2017). Per the applicant's representatives in attendance at this meeting, the sewer service in School St. which presently serves this building is to be discontinued. D.P.I. requires that it be abandoned at the property line, and that said abandonment is witnessed/inspected by a D.P.I. sewer inspector. In addition, D.P.I. requires that a clean out be installed within the sidewalk area (at 2' from the property line) on the new sewer service connection which is being installed off of School St. to service the existing building and the new addition to the north. It was also pointed out that if the "addition" is going to have a completely different main entrance than that being utilized by the existing building, they will have to apply for a new number for said door. Any further modifications to the revised plans discussed at the preconstruction meeting, said plans having been reviewed/commented on by D.P.I. at that time, must be resubmitted for review/approval. **The C.O. will not be signed for this project if it is determined at the time of final inspection that there was work performed that falls under the jurisdiction of D.P.I. but was not originally reviewed/approved by this department.**
- 2.) This project must be built in accordance with the approved S.P.R. plans and all D.P.I. comments on said review (per Memo to Planning Board dated 2/2/2016), and in accordance with the revised plans recently submitted for the D.P.I. preconstruction meeting on 2/7/2018, along with any other conditions set forth in regards to the development of this site at said meeting. **The C.O. will not be signed if the conditions set forth at the preconstruction meeting and in the D.P.I. review comments letter originally submitted to the Planning Board for this project have not been met.**
- 3.) Contact D.P.I. prior to applying for sewer/storm drain, water and driveway permits to discuss what materials will be required to be submitted to this office prior to these permits being issued. Several paper copies of the plan sheet(s) showing proposed utilities and driveway locations will be required by D.P.I. for permitting purposes. A permission letter from the property owner will be required in order for a representative/agent to sign permits. If applicable, a copy of the stamped foundation as-built plan and permit must also be submitted. If the property was acquired in the past 3 months, a copy of the recorded deed showing the new ownership must also be provided. **No permits will be issued by D.P.I. until the all required materials have been received. Any outstanding comments/issues must have been addressed prior to issuance of any permits from D.P.I. (please confirm with Deputy Commissioner).**
- 4.) Contact D.P.I. regarding compliance with the Industrial Pretreatment Program (IPP)/Fats, Oils, and Grease Program (FOG), which is required if your establishment falls under one of the following:

Industrial businesses require submission of a completed Industrial Discharge Permit Application (available on the City web-site).

Microbreweries require submission of a completed Industrial Discharge Permit Application (available on the City web-site) and installation of an accessible sampling port located on the final effluent of the brewing process.

Restaurants and other food service establishments require a grease trap be installed according to the Mass. Plumbing code and signed off by the Inspectional Services Dept. inspector and a FOG Application be completed and submitted (available on the City web-site).

Auto repair shops must have an MDC Trap and submit proof of a contract to be inspected/cleaned every six (6) months.

Dentists require submission of a copy of their Massachusetts Department of Environmental Protection "Certification Form for Massachusetts Dental Facilities" and installation of at least one (1) Dental Amalgam Separator System to service all of the facility's relevant dental chairs.

**Depending on which the previous categories your application falls under, no permits will be issued by D.P.I. and/or no Certificate of Occupancy will be signed until there is compliance with the requirements stipulated.**

5.) Contact D.P.I.-Engineering at (508) 979-1550 to measure for a new address number if the original door to which the address was assigned is relocated or removed, and/or new doors are added that will require legal address numbers. Any new building/structure will automatically have to apply for a new address. **No Certificate of Occupancy will be signed unless the legal address number that has been issued by Engineering for the door location(s) being utilized as the main entrance(s) of the structure are in place on the corresponding entrance(s).**

6.) Submit final site as-built to D.P.I. showing location of building/structure and all utilities (i.e. sewer, storm drain, water, etc.) installed as part of this project for City records. **No Certificate of Occupancy will be signed until this has been submitted to D.P.I.**

Please also note the following, which may be applicable to your site:

- a.) A joint sewer maintenance agreement is required between parties sharing a sewer service line, and will only be permitted by D.P.I. under extenuating circumstances.
- b.) The integrity of any previously existing service being re-utilized must be determined, and said testing witnessed by a D.P.I. inspector, prior to connection. The owner/developer assumes all responsibility of re-utilizing said service. The vertical and horizontal separation required between water and sewer must be provided for any new pipe being installed, and in areas where vertical and horizontal separation cannot be achieved, encasement or sleeving of the pipe will be required.
- c.) All old water services to be discontinued must be killed at the main, and any sewer services must be abandoned at the property line, in accordance with City standards and specifications, and said work must be inspected/witnessed by the proper D.P.I. inspector.
- d.) Recorded easements must exist for any water, sewer and drainage pipes being installed on other parcels to service the subject parcel. Recorded easements should also exist for any water, sewer and drainage pipes traversing the subject parcel to service other properties.
- e.) All new commercial driveways (or alteration thereof) must go before the Traffic Commission for approval prior to D.P.I. issuing a Driveway Permit. Any previous driveway entrances located along the perimeter of the property will have to be closed.

**THE COMMENT BELOW WAS ALSO ADDED SEPARATELY AS A "PRIVATE COMMENT" TO INSPECTIONAL SERVICES AND IS PART OF THE ABOVE REVIEW:**

Note to Inspectional Services: Kindly provide the applicant with a copy of the D.P.I. comments attached to this review in View Permit, or please direct them to D.P.I. and we will be glad to provide them with a copy. It is important that they are aware of the conditions of their approval.
