STATE BUILDING CODE

Danny O. Romanowicz

Building Inspector

Plan Review Comments:

: engineers final affidavit req. upon foundation completion

: Any changes, alterations, removal or installation of any gas or plumbing fixture will require a permit as per the provisions of Any 248 CMR.

: NOTE: FOUNDATION,,, WILL NEED ELECTRICIAN AND ELECTRICAL PERMIT ON THIS PROJECT AS WELL AS LEAVING A BOND WIRE TO THE REBAR IN THE FOUNDATION (UFER GROUND) FOR FUTURE ELECTRICAL SYSTEM GROUNDING.

: 1. Water service to be copper and 10ft away from sewer service.

2. Water curb stop/shut off to be 1.5ft from face of curb or pavement.

3. Water meter to be installed at the point entry 1.0ft inside cellar wall.

4. Owner to apply for a water permit.

5. All unused water services on the property to be removed from the water main.

: Need to complete an E-2 form before demolition

need to have an inspection of food facilities prior to opening

: Project can begin tree clearing and erosion control installation - Agent to inspect erosion controls after installation at which point, provided SWPPP is finalized, earth disturbance can begin.

: Project has an Order of Conditions from the Conservation Commission SE49-0778. Prior to signing off on foundation permit, need SWPPP submitted two weeks prior to construction start up, an on site with the engineer & contractor and the erosion controls installed.

RE: TB-18-1179

Theodore H. Rice Blvd. (N.S.) 280' W. x Phillips Rd.

[Proposed Convenience Store/Gas Station-New England Farms]

Plot 136/Lot 322

Reviewed: 6/14/2018

The following conditions are to be met by the owner/representative as part of this permit approval:

1.) Per the preconstruction meeting held at D.P.I. on 6/12/2018, all requirements/conditions as set forth by D.P.I. at said meeting in regards to the development of this site must be met accordingly, and all construction must be in accordance to City of New Bedford Construction Standards and Specifications. The revised plan submitted to D.P.I. prior to this meeting was titled "Proposed Convenience Store/Gas Station, 209 Theodore Rice Boulevard, New Bedford Massachusetts," with a date of 8/15/2017 (and revision date of 4/30/2018). As discussed with the owner's representatives in attendance at this meeting, the submitted plan must be revised prior to pulling permits at D.P.I. The revised site plan must incorporate the additional changes (i.e. configuration of proposed driveway apron(s), water/sewer service(s) to be abandoned in accordance with C.N.B. requirements, sizes of proposed service connection(s) and drainage utility easement needed by C.N.B. for existing drainage on property, etc.) as requested by D.P.I. in said meeting. Any further modifications to the final plan revision approved by D.P.I. must be resubmitted for review/approval. The C.O. will not be

signed for this project if it is determined at the time of final inspection that there was work performed that falls under the jurisdiction of D.P.I. but was not originally reviewed/approved by this department.

2.) This project must be built in accordance with the approved S.P.R. and all D.P.I. comments on said review (per Memo to Planning Board dated 10/16/2017), and in accordance with the final revised plans that are submitted/approved by D.P.I. as the result of the preconstruction meeting, along with any other conditions set forth in regards to the development of this site at said meeting. The C.O. will not be signed if the conditions set forth at the preconstruction meeting and in the D.P.I. review comments letter originally submitted to the Planning Board for this project have not been met.

3.) Contact D.P.I. prior to applying for sewer/storm drain, water and driveway permits to discuss what materials will be required to be submitted to this office prior to these permits being issued. Several paper copies of the plan sheet(s) showing proposed utilities and driveway locations will be required by D.P.I. for permitting purposes. A permission letter from the property owner will be required in order for a representative/agent to sign permits. If applicable, a copy of the stamped foundation as-built plan and permit must also be submitted. If the property was acquired in the past 3 months, a copy of the recorded deed showing the new ownership must also be provided. No permits will be issued by D.P.I. until the all required materials have been received. Any outstanding comments/issues must have been addressed prior to issuance of any permits from D.P.I. (please confirm with Deputy Commissioner).

4.) Contact D.P.I. regarding compliance with the Industrial Pretreatment Program (IPP)/Fats, Oils, and Grease Program (FOG), which is required if your establishment falls under one of the following:

Industrial businesses require submission of a completed Industrial Discharge Permit Application (available on the City web-site).

Microbreweries require submission of a completed Industrial Discharge Permit Application (available on the City web-site) and installation of an accessible sampling port located on the final effluent of the brewing process.

Restaurants and other food service establishments require a grease trap be installed according to the Mass. Plumbing code and signed off by the Inspectional Services Dept. inspector and a FOG Application be completed and submitted (available on the City web-site).

Auto repair shops must have an MDC Trap and submit proof of a contract to be inspected/cleaned every six (6) months.

Dentists require submission of a copy of their Massachusetts Department of Environmental Protection "Certification Form for Massachusetts Dental Facilities" and installation of at least one (1) Dental Amalgam Separator System to service all of the facility's relevant dental chairs.

Depending on which the previous categories your application falls under, no permits will be issued by D.P.I. and/or no Certificate of Occupancy will be signed until there is compliance with the requirements stipulated.

5.) Contact D.P.I.-Engineering at (508) 979-1550 to measure for a new address number if the original door to which the address was assigned is relocated or removed, and/or new doors are added that will require legal address numbers. Any new building/structure will automatically have to apply for a new address. No Certificate of Occupancy will be signed unless the legal address number that has been issued by Engineering for the door location(s) being utilized as the main entrance(s) of the structure is in place on the corresponding entrance(s).

6.) Submit final site as-built to D.P.I. showing location of building/structure and all utilities (i.e. sewer, storm drain, water, etc.) installed as part of this project for City records. No Certificate of Occupancy will be signed until this has been submitted to D.P.I.

Please also note the following, which may be applicable to your site:

a.) Any new mains installed must be inspected, tested (witnessed by a D.P.I. inspector), and approved for connection, and the respective as-built must be submitted prior to D.P.I. issuing permits for individual house connections. Installer is responsible for meeting minimum required vertical and horizontal separation for water and sewer mains and services. A joint sewer maintenance agreement is required between parties sharing a sewer service line, and will only be permitted by D.P.I. under extenuating circumstances. A joint water maintenance agreement is required between parties sharing a water service line, and will only be permitted by D.P.I. under extenuating circumstances.

b.) The integrity of any previously existing service being re-utilized must be determined, and said testing witnessed by a D.P.I. inspector, prior to connection. The owner/developer assumes all responsibility of re-utilizing said service. The vertical and horizontal separation required between water and sewer must be provided for any new pipe being installed, and in areas where vertical and horizontal separation cannot be achieved, encasement or sleeving of the pipe will be required.

c.) All old water services to be discontinued must be killed at the main (please note that the C.N.B. Construction Standards and Specifications manual delineates the different requirements to be met, dependent on the size of the water service connection being killed), and said work must be inspected/witnessed by the proper D.P.I. inspector. All old sewer services to be discontinued must be abandoned at the property line, in accordance with City standards and specifications, and said work must be inspected/witnessed by

the proper D.P.I. inspector.

d.) Recorded easements must exist for any water, sewer and drainage pipes being installed on other parcels to service the subject parcel. Recorded easements should also exist for any water, sewer and drainage pipes traversing the subject parcel to service other properties. It is the responsibility of the engineer and/or surveyor to show all existing/proposed easements on the site plan being submitted to D.P.I. for review. Thus, the engineer and/or surveyor assumes any and all responsibility for any conflicts or issues arising due to their omission of existing/proposed easement location information for the parcel(s) to be reviewed.

e.) All new commercial driveways (or alteration thereof) must go before the Traffic Commission for approval prior to D.P.I. issuing a Driveway Permit. Any other pre-existing curb cuts along the perimeter of the property will have to be closed. Recorded easements must exist for any driveways being installed on other parcels to service the subject parcel. Recorded easements should also exist for any driveways traversing the subject parcel to service other properties. Please inquire with Inspectional Services if an agreement needs to be recorded for proposed driveways that are to be "shared in common"/jointly by multiple parcels/entities, but for which there are no easements.
: ASK-D.P.I. Engrg.

RE: TB-18-1179

Theodore H. Rice Blvd. (N.S.) 280' W. x Phillips Rd.

[Proposed Convenience Store/Gas Station-New England Farms]

Plot 136/Lot 322

Reviewed: 5/21/2018

Denied for the following reasons:

- 1.) Must submit a set (full scale paper copy) of the most recent plans, reflecting any revisions requested by D.P.I. (as per comments letter submitted to Planning Dept. on 10/16/2017) and/or by other departments, to be reviewed by this department;
- 2.) Must schedule a preconstruction meeting with Manny Silva, Deputy Commissioner, prior to D.P.I. approving Foundation Permit.

: Foundation for a commercial Building.

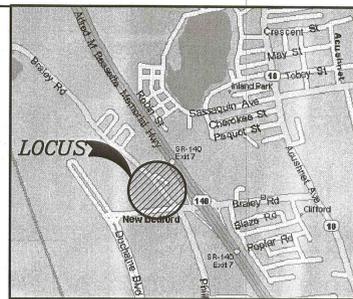

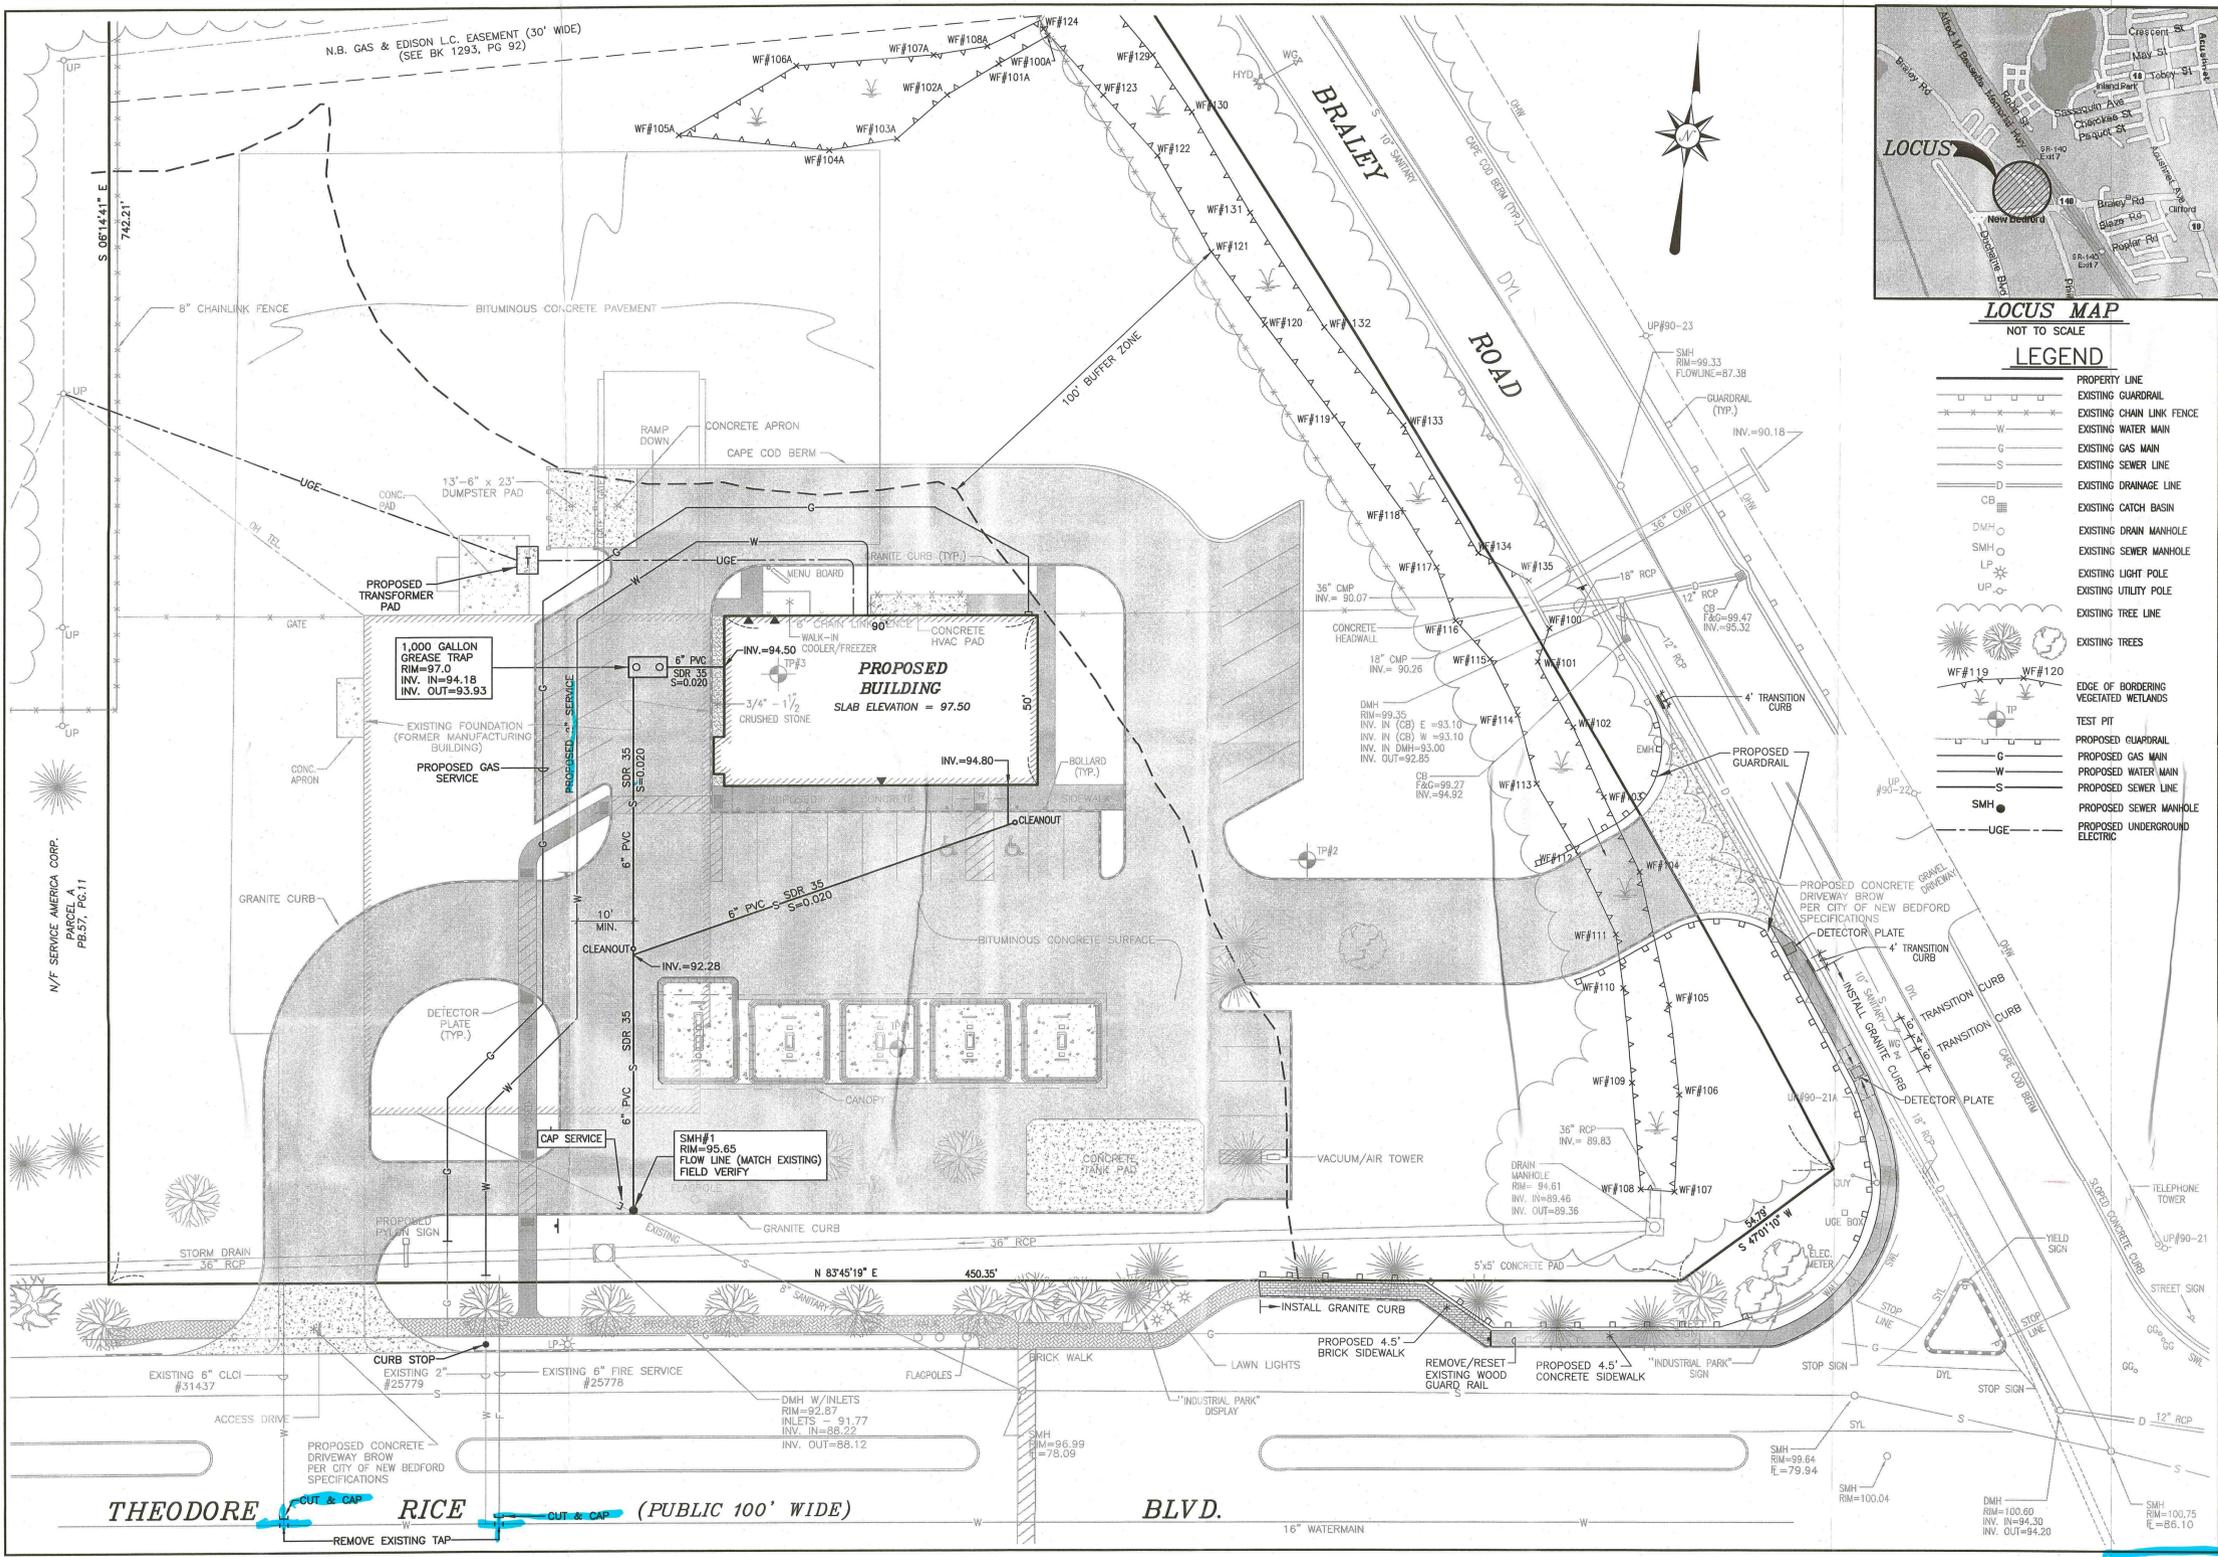

Convenience store / gas station with drive-thru

: Foundation for a commercial Building.

convenience store / gas station with drive-thru

: Note from Planning

Please note, this permit approval is for the foundation only. Conditions as stipulated within the decision still apply and will require review prior to building.
