I spoke with John they have not gone for the cut and cap yet. He said that it will not likely be a few months from now. They still have a lot of renovations they are doing.

Re; Permit # TB-20-1955

The 6" water line coming from Flaherty Drive will be for Domestic use and production. (rinsing fish & scallops, clean up, etc.,)

The existing 1-1/2" domestic line does not allow enough flow for their needs, nor would it allow for any growth.

There is an existing 8" sprinkler line coming in from Samuel Barnett that will remain unchanged. There are no new hydrants, hydrants shown are all existing.

We shall add existing utility info from Flaherty Drive to our site plan and try to have that back to you by mid day today.

Conditionally approved.

1. Proposed 79'x 25' mechanical room addition's roof will be collected and infiltrated into the site's existing infiltration system. Therefore, no additional stormwater requirements needed.
2. Proposed site plan, dated 10/26/2020, does not specify additional water or sewer services. If the project does require services, a revised plan will need to be submitted to DPI for review.
3. The proposed mechanical room has exterior doors. These doors cannot be labeled on the exterior with numbers, only the main entrance door can have "214" affixed to it/near it as the reference to the address for the facility.
