Sewer and water connections

Dear Mr. Labelle;

At this time, on be half of our client, we would like to request that the existing water services and sewer service be allowed to be cut and capped at the property line, so that in the future the services maybe re used or abandoned at the main as required. The down turn of the economy has affected the development of this property and the existing building is in disrepair. As such Cornish Partners would like to demolish the building.

Please contact me at our office 1-508-998-2125 if any questions arise or if further information is required.

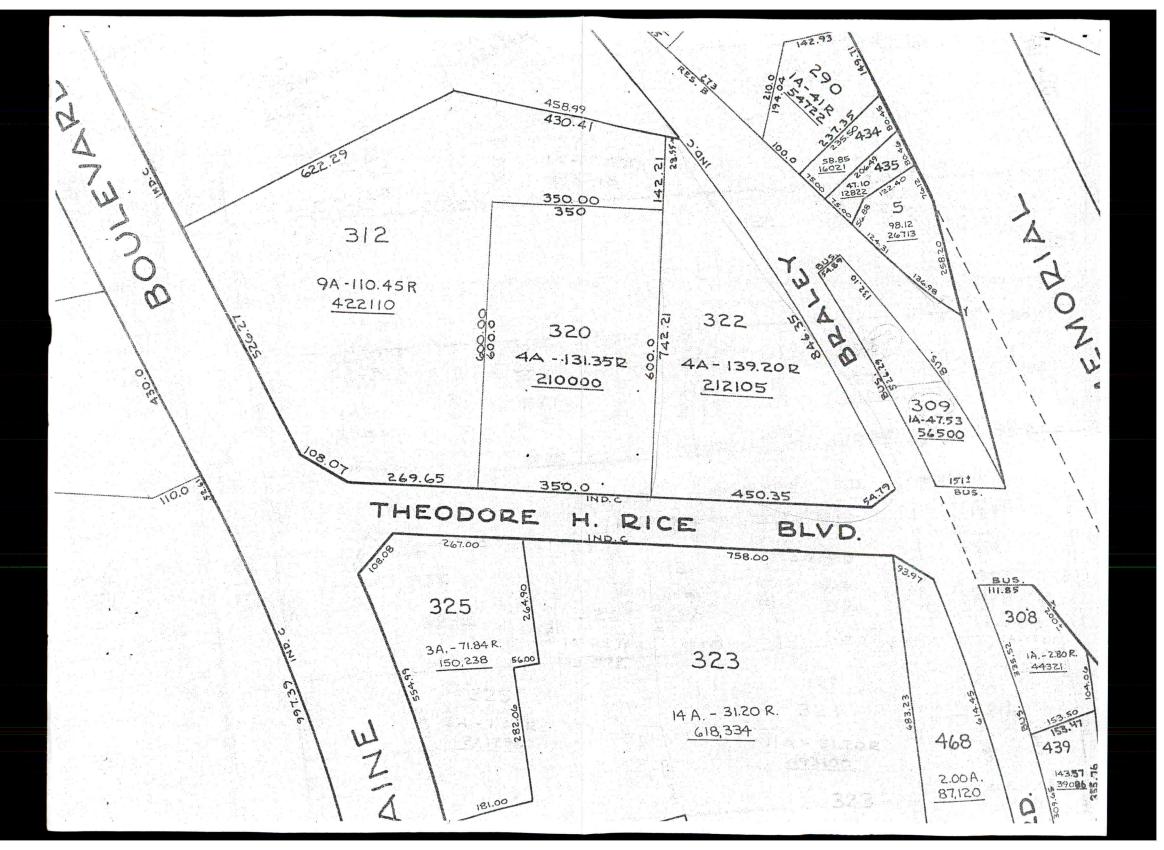

Sincerely,

SITE

John Keegan
